REPORT INTRODUCTION

Purpose of the Report

The renewal report is a summary of findings and a resulting recommendation regarding renewal of the charter or contract for an operator-run school. To inform this recommendation, Baltimore City Public Schools collects and analyzes documentation including the school’s renewal application, and an evaluation of the school’s performance based on the renewal rubric, the School Effectiveness Review (SER) performed on site at each school and consideration of all other relevant information.

City Schools’ renewal criteria are based on state law (§ 9-101, *et seq.*, MD. CODE ANN., EDUC.) and Baltimore City Board of School Commissioners’ policy IHBJ and associated administrative regulations (IHBJ-RA and JFA-RA). The Board’s policy requires that schools up for renewal be evaluated on multiple measures including, but not limited to, the following:

- **Student achievement**, constituting at least 50 percent of the renewal score and including measures such as schoolwide performance on state assessments, College and Career Readiness (for schools with high school grades), academic programming for special student populations, and a school’s fidelity to its charter
- **School climate** (chronic absence, suspensions, enrollment trends, school choice data, and school survey results from parents, teachers, and students)
- **Financial management and governance** (annual audits, school budget submissions, grants management, board documentation; compliance/adherence with federal, state, and local laws, rules, and regulations)
- An overall finding of not effective in any of the key areas (Student Achievement, School Climate, or Financial Management/Governance) may be the basis of a non-renewal decision.

The renewal process is a component of City Schools’ annual review of its school portfolio, designed to ensure that students and families across the district have access to school options that meet their interests and needs. In 2011, City Schools formed the Renewal Stakeholders Working Group (composed of school operators from a range of school types, Supporting Public Schools of Choice, and the Maryland Charter School Network) to develop a methodology for evaluating the performance of operator-run schools. The result: a fair, transparent, and rigorous renewal framework that reflects schools’ unique nature and innovative contributions to student achievement, used for the first time in the 2012-13 school year, and a process for reviewing and updating the framework each year.

At the conclusion of each year’s renewal cycle, staff engages operators and other key stakeholders in a review of the process to identify areas for improvement that could be addressed while still maintaining a level of predictability for schools up for renewal in the following year. Key changes made to the framework as a result of this most recent review include the following:

- For the PARCC Growth measure, schools’ growth was determined by using the state growth percentile. In previous years, the Baltimore City’s growth percentile was used to determine growth rates. For rating purposes, schools’ growth rates continue to be compared only to other Baltimore City schools with the same tested grade bands.

- A new measure, Effective Programming for All Student Racial/Ethnic Groups, was added to the renewal rubric for schools with sufficient diversity in their student bodies for a meaningful comparison. The measure considers whether schools are providing quality programming for students in different student groups by examining instructional approaches and processes in place, schools’ use of data to identify differences in achievement among student groups, and the success of schools in addressing these differences. Previously, these factors were considered as part of the Fidelity to Charter/Overall Application measure.
- Parent satisfaction survey ratings are based on an absolute scale. In previous years, schools were ranked against other schools in their grade band to determine parent satisfaction ratings.
- Selective high schools that use PARCC scores as part of their entrance criteria are not included in comparison groups for the PARCC Absolute rubric measure.

The Process

The review process has the following components:

- Renewal rubric (includes data from standardized assessments and school surveys)
- Application for renewal
- Data tables prepared by City Schools
- School Effectiveness Review

The process starts with a review by the Charter and Operator-led Advisory Board, whose members represent foundations, nonprofit organizations, school choice advocates, school operators, and district representatives; and whose function is to provide advice to the CEO on renewal and other issues as they relate to operator-led schools. In performing its review, the Advisory Board looks at all data and information, both quantitative and qualitative, to make sound recommendations to the CEO. After its review of the components above, the Advisory Board makes recommendations to City Schools’ CEO on whether charters or contracts should be renewed. The CEO considers the recommendations and the quantitative and qualitative review, and then makes her own recommendation to the Board. In some instances, the nature or severity of an issue raised during the renewal process is serious enough to give it extra weight in formulating the renewal recommendation and, ultimately, the renewal decision, especially in instances where the issue affects the wellbeing of students, staff, or the district as a whole. For the Financial Management/Governance section, a rating of not effective in any one of the three elements that make up that section results in a rating of not effective for the entire section.

According to Board policy, City Schools may determine that a public charter school is eligible for an eight-year contract term, five-year contract term, three-year contract term, or nonrenewal. The eight-year renewal term is an option based on the updated Public Charter School Policy IHBJ, adopted by the Board in September 2019. The policy allows the Board to consider an eight-year term for schools that have “two or more consecutive full renewals, including demonstrating quality programming for all student groups” and that have met the standard for a five-year renewal in the year of the latest review. The ultimate decision on all operator renewals rests with the Board, which considers the recommendations and rationale of the CEO, the operator renewal report, testimony

given at public Board meetings and work sessions, the contents of the official record and the factors listed in policy IHBJ and administrative regulation IHBJ-RA for charter schools, and policy FCA and administrative regulation FCA-RA for non-charter schools.

Discussion

On January 14, 2020, the Baltimore City Board of School Commissioners voted to renew the contract with Five Smooth Stones Foundation, Inc., to operate Baltimore Collegiate School for Boys for three years. As condition to this renewal, prior to signing the new contract, Five Smooth Stones Foundation must procure a permanent facility for the school. Additionally, as part of ongoing conditions in the new contract the operator must engage in professional development for operator leadership on school operations and requirements, conduct mandatory training for all staff on procedures for students with disabilities, bullying, suspension and whole child development, and meet quarterly requirements for grade entry, interim reporting and other record keeping as required by district policy and set forth in the new contract. All of these conditions are subject to the review and approval of the CEO and/or the CEO's designee.

The school was rated developing in Academics, Climate and Financial Management/Governance.

In PARCC achievement growth, a measure that assesses changes in individual student growth over time compared to other students who started with a similar scale score, the school was rated highly effective in math 6-8 (82nd percentile overall), and developing in English Language Arts (ELA) 6-8 (61st percentile), and math 3-5 (64th percentile). However, the school was rated not effective in ELA

¹ Total enrollment counts reflect the MSDE official enrollment file for grades k-12, which includes students enrolled on September 30 each year. This file is verified by MSDE prior to becoming the official enrollment count for the year.

² Financial management considers a review of the operator's audits over the contract term. "Meets expectations" is the highest rating available, followed by "Developing" and "Does not meet expectations".

3-5 (32nd percentile). The growth measure has the most weight of the PARCC measures in the renewal rubric. For PARCC absolute performance, schools are compared to a Poverty Index (PI) group, made up of schools with similar levels of annual household income within the same grade band because absolute performance is highly correlated with household income. The school was rated not effective in PARCC absolute performance in math 6-8 (32nd percentile in its PI group with a mean scale score of 712), ELA 6-8 (14th percentile in its PI group, with a mean scale score of 716), math 3-5 (16th percentile in its PI group, with a mean scale score of 719) and ELA 3-5 (8th percentile in its PI group, with a mean scale score of 712).

The school was rated effective in Student Attendance: Chronic Absence, which evaluates not only a school's data in that area, but also its practices and interventions implemented in response to those data. Data shows the school lowered its chronic absence rate from 14.7% in 2017-18 to 2.1% in 2018-19, while also raising overall attendance to 98.2%. However, the school needs to continue work to ensure that all practices in this area are in compliance with district policy. The school was rated developing in Operator Capacity, indicating that “the operator has not consistently met all critical District obligations, but has demonstrated progress in complying with all requirements.” There have been concerns at the school regarding student scheduling and grades, as well as in the school's ability to meet the social-emotional needs of some student populations. The operator has taken accountability, demonstrated improvement in this area and has taken affirmative steps to address issues as they have arisen. However, the school must continue to focus on improving practice as this is a major area of growth for this operator.

Findings (elementary/middle school rubric)

Category 1, Academics: Is the school an academic success?
